Confirmation of Course Participation

Mr Latif GUNGOR

**participated in our training from 15.10.2022 to 08.11.2022
and completed it successfully.**

Programming in Javascript - JS Module 1

Upon successful completion of this course, the participant has proven to have the essential knowledge and skills to create algorithms and transfer them to the programming language using Javascript language constructs. The course lasted of 42 lectures and included the following main topics:

- Analyzing problems and developing algorithmic solutions.
- Creating algorithms using flowcharts
- Understanding data types and their memory and CPU handling
- Using Javascript conditional structures for decision making
- Using loops for repeated tasks
- Using arrays to solve problems with a series of data
